Our Policy is to reach the heights of our customer's expectations and our aim is customer satisfaction.

We (VICC), has played a vital and active role in trying to achieve the objective of self-sufficiency in the Steel Fabrication field, Civil Construction, Maintenance & Industrial Engineering Services.

We (VICC), business started in the year 2022, has done pioneering work in the field of Fabrication stretching almost over the entire terrain of Saudi Arabia., which deals with & encompasses all type of steel constructions and are not limited to:- Multi-Discipline Engineering, Contracting, Manufacturing & Industrial Engineering Services – Mainly in Mechanical and Civil Construction Of Industrial Nature such as fabrication of steel structure, Storage Tanks, Steel piping (CS Piping, SS Piping & Alloys, etc.), Crane Girders, Vessels, Tank farms, stairways, Heat exchangers, pipe works, S.S.Water tanks, warehouses, etc.

We (VICC), personnel specialize in machining, repairing, maintaining, designing and developing press tools, dies, molds, jigs and fixtures.

VISION

To be world's leading structural steel solution provider.

MISSION

Our mission is to provide quality fabrication, installation, and erection of structural steel & process equipment at a fair and competitive price. We commit to provide excellence and value in our structural solutions. and also machine shop activity. Our dedicated approach delivers exceptional quality, predictable outcomes, continuous growth, opportunities and mutually beneficial relationships.

VALUES

Doing the
right thing

Having passion
for what we do

Embracing the
pursuing change

Providing
uncompromised quality

Developing
sincere relationships

OUR MAIN FOCAL POINTS

FOCUS ON SAFETY

We understand that a turnaround has inherent safety risks for all parties involved. That is why we make safety a top priority in addition to the work being completed. We ensure that all safety guidelines are thoroughly explained to workers and we provide on-going safety supervision.

CAREFUL PLANNING

A turnaround is a complicated undertaking. Before we do anything we formulate a thorough plan that is tailored to meet the needs and situation of the particular customer and turnaround. Through this careful planning, we are able to maximize efficiency and provide superior results

CLEAR COMMUNICATION

We pride ourselves on establishing a close working relationship with each of our customers. This allows for clear, direct communication, ensuring that the primary objectives of the turnaround are well understood and have been carefully taken into consideration

PROJECT MANAGEMENT

Overseeing a turnaround is a very complicated logistical undertaking. However, Vinsub International Contracting Co., has years of experience in project management and we are dedicated to overcoming every obstacle that arises. We provide the scheduling services, record keeping, and multi-department interfacing that are necessary to keep the turnaround on track.

SKILLED WORKERS AND CRAFTSMEN

Naturally one of the biggest and most important aspects of a turnaround is the actual labor that needs to be done. We use only the most highly skilled workers and craftsmen. Our workers are qualified craftsmen and are extremely knowledgeable and proficient in their jobs.

SPECIALTY WELDING

We provide premium specialty welding and field services. Our highly skilled specialty welders have the metallurgical expertise and field experience it takes to weld on a full range of materials and industrial equipment. While our rigorous quality practices result in weld rejection rates that average less than 1 percent, Our meticulous planning and scheduling, project management agreement also ensure a smooth, seamless experience for our customers with minimal disruption to the job site.

REPAIR AND MAINTENANCE

Vinsub International Contracting Co (VICC), has the ability to attend and ensures complete Repair & Maintenance of your Boilers, Heaters, and Power Plants. Our employees are fully trained and highly experienced and are committed to managing the contracting effort in a way that will increase owner profitability. We partner with our customers to achieve the long-range goals that are the keys to their long-term success.

PIPING & MECHANICAL SERVICES

We (VICC), offers Industrial Piping and Mechanical General Contracting Services. We serve as your partner with the common goal of finishing the project on time and within budget.

We provide expert assistance to our clients through each phase of the project, from design to regular maintenance. Our service capabilities include the following

DESIGN

We (VICC), can replicate existing customer designs or we can create new designs based on customer specifications and needs. We utilize a latest modeling program that allows you to see an interactive model of your design.

FABRICATION

We (VICC), are multiple, high capacity fabrication facilities ensure that we have the skills and resources needed to fabricate your piping and mechanical projects quickly and effectively. We currently operate in high end and sizable fabrication shop space and have shifts running day and night to meet the demands of our clients.

INSTALLATION

We (VICC), being a service provider with the capability of not only fabrication but installation as well has many advantages throughout the project. We are able to be the single point of contact from design through installation and can clearly communicate each milestone within the projected timeline.

HEAT EXCHANGER SERVICES

We (VICC), provides industrial exchanger services. Heat exchangers play a vital role in a wide array of industrial applications. They are responsible for the heating or cooling of industrial fluids and substances, or equipment. Without a properly functioning heat exchanger the entire system will become inefficient, inoperable, or downright dangerous. This is why the performance and maintenance of heat exchangers can be crucial to your operations. We also have the unique capability of being able to pick up and deliver your equipment to provide the necessary services offsite when needed.

A name you can ever trust

MAINTENANCE

We (VICC), are all fabrication and installation jobs will require regularly scheduled maintenance for quality assurance. Our team of skilled craftsmen and inspectors can help assess the quality and integrity of the structural pieces throughout their use.

Our project management teams and craftsmen are fully dedicated to meeting your schedule and budget with a focus on safety and quality. Our vast experience includes projects of all sizes having completed several million man hours in maintenance, turnaround, construction projects and public facilities. We (VICC) can handle piping and mechanical projects, as standalone projects, or as part of a general construction, or multi- discipline project. Our experienced estimators, project managers, supervisors, crews and craftspeople have the necessary skills, knowledge and experience to consistently deliver outstanding results on your project.

OUR SPECIALTY

We (VICC), know that in order to do this job safely and effectively it is essential to have highly skilled craftsmen and advanced facilities. Our facilities are certified. In addition to our operating facilities our highly skilled and safety-oriented craftsmen are hand selected based on their individual experience in the exchanger industry. The bottom line is that VICC has the experience, resources, and know-how to handle all of your industrial exchanger needs from constructing and installing brand new units, to keeping your existing models running at high performance levels.

WELDING

VICC Welding works using FCAW and SMAW processes are based on the structural Welding Code of the American Welding Society and the Specification of the American Institute of Steel Construction.

Daily workmanship of all welders are being monitored and evaluated every 6 days consecutive working period as required by the VICC Quality Control System.

Welding Process	: FCAW
Electrode Specification	: AWS A5.20
Electrode Classification	: E71T-1
Welding Process	: SMAW
Electrode Specification	: AWS A5.1
Electrode Classification	: E7018

OUR RESOURCES: MANPOWER, MACHINERY & INFRASTRUCTURE

To meet the needs of its customers, We (VICC) stands on the know-how of an experienced team:

We (VICC) have,

- **Professional, experienced engineers**
- **Reliable estimators capable of assessing various projects**
- **Qualified production technicians**
- **Specialized manpower**

This team can assist you in any type of fabrication and erection of steel products and structures. We (VICC) have the equipment support to meet the various standards or more complex needs of its customers in the construction field.

QUALITY CONTROL

We (VICC), have Quality Control function is to develop and implement an integrated sequence or specific control on quality relative to materials, process and product based on quality aspects of industry specifications and customer requirements, design specifications and manufacturing process requirements to assure a timely shipment of products with proper quality at relatively minimum costs. Top quality raw materials are used to manufacture metal components for steel structures or heavy steel work. Each employee receives the proper quality assurance training and is doing his/her job with the outmost care.

The company has a better control of its finished products with its parts checking system. It ensures that the product is ready for its intended use at the job site without modification. After blast cleaning of Structural Steel Members, the degree of cleanliness, surface profile and salt contamination tests are conducted to determine compliance with specified client requirements.

We (VICC), are focusing very hard on logistics to ensure that there is no delay or modification to be done at local job sites or during preparations for foreign projects.

TURNING & MILLING

Our goal is to help our customers achieve a competitive advantage by providing solutions that return superior business results.

HIGH QUALITY TIGHT TOLERANCE COMPONENTS

VINSUB Machined Components Done Right, on Time.
VINSUB Manufacturing is a fully equipped machine shop with an excellent reputation in the industry.

We (VICC) can produce all type of machining spare parts

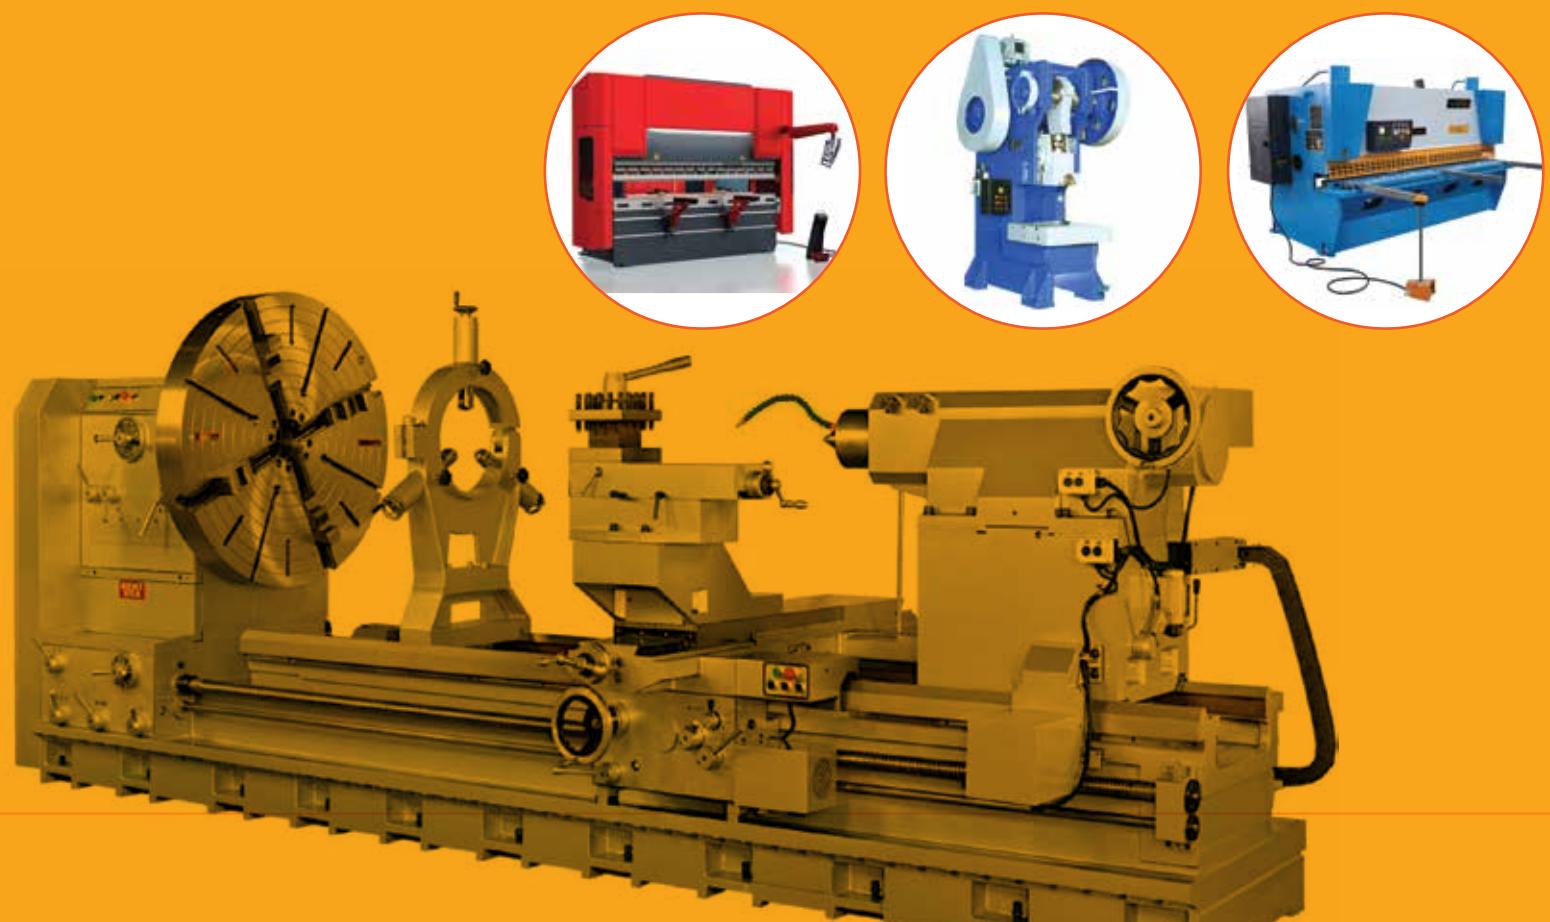

Our machines and expertise allow us to work with almost every material and our in-house design capabilities make us a one-stop shop for your CNC needs. We work with steel, aluminium, brass, peek, copper, many plastics and composite materials and we take care of post-machining services such as welding, bending, brushing, anodizing, engraving and plating.

WE DO NOT COMPROMISE ON QUALITY

We are ISO 9001:2015 certified, our machines are top of the range and we are committed to providing high quality CNC machined products to our clients and to work with them to reduce lead times and costs having an obsession for precision and quality.

WE ARE A FAMILY RUN COMPANY

We care about our work and take pride in providing a personalised service to all our customers.

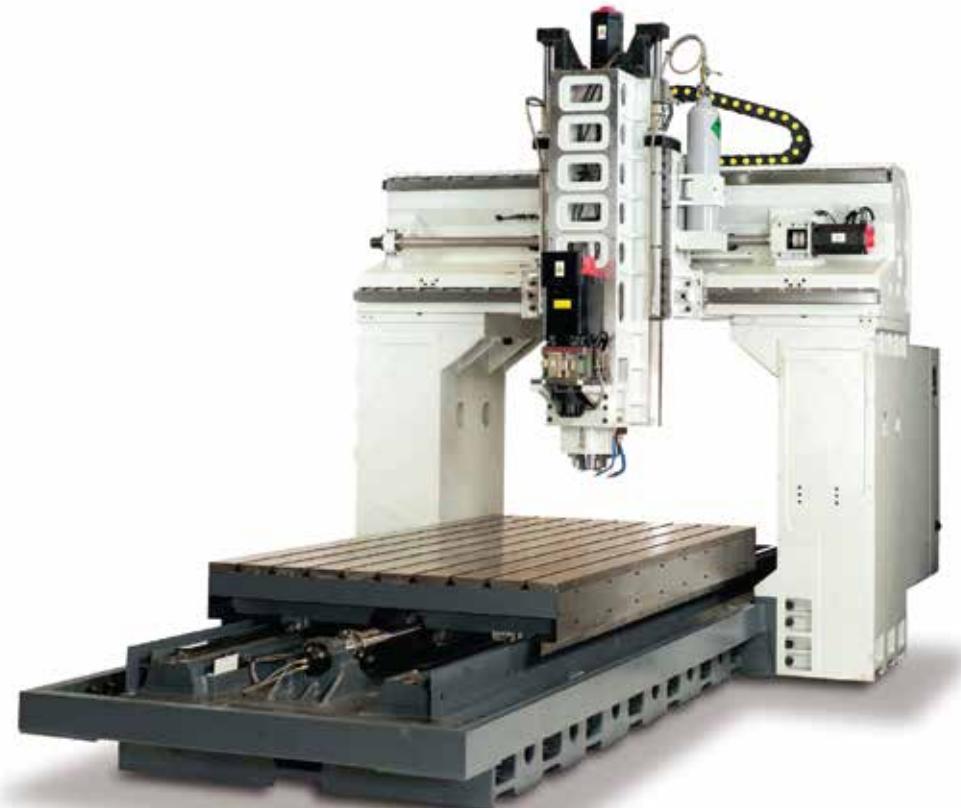

A name you can ever trust

OUR WORD MATTERS

If we commit to a deadline, we will deliver, with no delays or surprises. We provide precision CNC machining services to produce milled or turned parts in a variety of materials.

Whether you are looking for large volumes, or a very small batch for prototyping, we can help you produce your parts quickly and accurately.

OUR CLIENTS ARE OUR PRIORITY

We strive to give you the best possible customer experience, from the initial quote, to the delivery of the very last component.
